

Cats were spotted near you!

We received a request to help with the cat population in your neighborhood. Volunteers need your help to **trap-neuter-return (TNR)** these cats.

Santa Clara County has over 150,000 **outdoor feral or stray cats** roaming the streets. **TNR** is the only way to stop population growth, keep cats healthy, and save kittens.

Through a **FREE** program at **San Jose Animal Care Center (SJACC)**, community cats can be fixed (spayed/neutered), microchipped, vaccinated, and flea-treated. Volunteers **return the cats back** to the neighborhoods they call home.

Cats that are already fixed will have a small ear tip or notch. All other cats need to be fixed.

Did you know?** Unspayed female cats can give birth up to **FOUR** times per year. Since cats can reproduce at 4 months old, she and her offspring can become **50 or more cats in a year!

If you:

- feed or have cats visiting your property
- see kittens or hear meowing
- want to help trap (*our favorite!*)
- or have any questions or concerns

please text or call 408-384-8694.
