

# We are fixing cats for FREE in your neighborhood. We need your help!

If you feed or care for outdoor cats please **call or text 408-384-8694**.

## What is trap-neuter-return (TNR)?

Feral and community cats are humanely trapped, fixed (spayed/neutered), and vaccinated at Humane Society Silicon Valley (HSSV). **All feral cats are returned** to the neighborhood.

## Why spay/neuter and vaccinate?

Santa Clara County has over 500,000 outdoor feral or stray cats roaming the streets. Trap-neuter-return (TNR) is the only way to stop population growth, and prevent diseases, fighting, breeding, and suffering. Unspayed female cats can give birth up to FOUR times per year. She and her offspring can become **50 or more cats in a year!**

## Are our pets getting trapped?

Pets, friendly cats, cats with collars, and microchipped cats are **NOT** trapped. If you need help to spay/neuter your pet, please reach out.

## Please text or call 408-384-8694 if you...

- Care for or **feed feral or stray cats**
- **See kittens** or hear meowing
- Have **pets** that need spay/neuter

Fixed feral cats have an ear tip.  
If you feed cats, fill out
